Network Solutions

When using port 10000 to receive corrections you **must** turn on your NMEA (GGA) message string, and it must be set to broadcast at an interval of less than 30 seconds.

Rinex Service

The issues we were having with Rinex requests and Chrome have been resolved. Be sure to clear your cache when using Chrome to make these requests.

We are experiencing problems with the file availability page on the FPRN website. Most of the files are available but are not being shown correctly on the web site. If you are in need of a specific file go ahead and make the request. If the system does not respond within 24 hours, send an email requesting the information needed.
